### DETAILED ACTION

1. This action is in response to the appeal brief filed 5/31/06.
2. Claims 1-22 are allowed.
3. The following is an examiner's statement of reasons for allowance:

As the appellant pointed out in the Brief, at p. 8:1-9:6, the prior art of record does not specifically teach or disclose an application development tool that facilitates application development in a design time environment and reports at least one of simulated run time and compile time information based upon design time attributes, wherein the type descriptor dynamically provides information associated with an instance of the software component to the development tool. These claim limitations are recited in each of the independent claims 1, 8 and 14; thus, dependent claims 2-7, 9-13 and 15 are also allowed.

As the appellant further pointed out in the Brief, at p. 9:21-10:15, the prior art of record does not specifically teach or disclose an application development tool that facilitates application development by simulating component behavior at one of a design time and a runtime. These claim limitations are recited in each of independent claims 16, 18 and 21; thus, all remaining dependent claims 17, 19-20 and 22 are also allowed. The system improves the development process and

reduces development time, by using simulated runtime information to optimize the application during the development/design-time stage.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
